Naturally Fractured Reservoirs Naturally fractured reservoirs hold large hydrocarbon resources and represent attractive economic targets in exploratory ventures. Dr. Aguilera's course provides a modern, unique and successfully tested approach for evaluation of naturally fractured reservoirs and is designed as a graduate level course in petroleum engineering. Naturally Fractured Reservoirs | Schlumberger Naturally Fractured Reservoirs Understand fracture systems in your reservoir Detailed knowledge of the extent, orientation, and permeability sensitivity of fracture systems in your reservoir are essential for well trajectory and completions planning. Recognizing naturally fractured reservoirs - petrowiki.org Naturally fractured reservoirs are elusive systems to characterize and difficult to engineer and predict. It is important to establish some basic criteria for recognizing when fractures are an important element in reservoir performance and to recognize the nature and performance characteristics of a naturally fractured reservoir.

Naturally Fractured Reservoirs Characterization & Analysis ... Detect and predict subsurface natural fracture occurrence and intensity from cores and well logs; Determine fractured rock properties affecting reservoir performance; Design and analyze pressure transient tests in naturally-fractured reservoirs; Evaluate reservoir performance in naturally-fractured reservoirs. Naturally-fractured reservoirs - TestWells In naturally-fractured reservoirs, the derivative tends to show several stabilizations at different levels. Depending on the selection of the radial flow regime, different well and reservoir models may be possible. Naturally-fractured reservoirs | SPE Hydraulic fracturing in naturally fractured tight formations causes complex fracture geometry corresponding to the existence of natural fracture as well as geomechanical characteristics. It is extremely important when stimulating fluids such as water, brine, and CO₂ are injected into tight carbonate reservoirs for increasing recovery.

Naturally Fractured Reservoirs Training Course ... Behavior and stimulation of naturally-fractured reservoirs; Effects of natural fractures on reservoir permeability, anisotropy, drainage area, and waterflood sweep efficiency; Instructors: MR. RODOLFO CAMACHO-VELAZQUEZ is a reservoir engineering consultant with extensive experience in researching naturally fractured reservoir dynamic characterization to estimate reserves and formation properties.
